**Amplitude : A Visual Novel** is one of few story-driven game I can enjoy so far. Amazing storyline, unusual plot, a lot of combination for ending and good hidden achievements as well. The game really suit for busy people that want exposure of playing a game during their free time without focusing on gameplay. Also bonus for FQ player to see the resolves of the prequels true ending make it a good puzzle for their fans.

One weakness that I feel personally is the story has many explorable characters but lack of development for those characters, even for multiroute visual novel. Despite of short amount of time player has to solve the story "Puzzle", the climax supposed to explored the other characters deeper, at least compared to the prequel.

Overall I would recommend anyone with interest in light Fantasy/Sci-fi/Mystery themed game lovers. 7.9/10. Keep up the good work, Ceylon Entertainment!! ^^. It's a pretty cool game. It's indie, and there's a little jankyness, but no game breaking bugs. Kinda difficult at first, there isn't much hand holding here. After a few hours of play and reading a couple little guides on steam, I'm doing well. Thumbs up.. It's alright. Moto Racer 4 is back on track for good.

I will do a quick evaluation PROs/CONs

**PRO:**

- Really fun on splitscreen
- Easy to handle (it takes a few laps to really handle the joystick but after it's really easy to master it)
- you can push your opponents out of tracks. In Splitscreen mod it's just awesome how your friend can be mad at you really quickly!
- Good Carreer mode / Good difficulty level. You can choose yourself the difficulty. 1st race took me 30min before being able to beat the 3stars!!
- IA is really tough sometimes so it's great because it's never easy. You've got to do the perfect race everytime.
- Good number of tracks and Racers so far
- HUD is simple.

**CON:**

- For now it's hard to find a party online. First time I was lucky I found it instanly. Now it much much longer. We need more people online guys! -> Invite your friend mode works well.
- Can't add IA on multiplayer to fill the rank.

**Suggestion:**

- Replay mode to edit video would be great.
- Being able to personalise the soundtracks.

It's really an arcade game. I've seen people complaining about the graphics. I disagree with them as this game is not a simulation game. it's more focus on the fun and how easy it is to handle. And for that Moto Racer 4 is doing a good job.

The only con would be that there are not enough players online.. This game seems like it would be fun, except the control system is over sensitive while the swing and feel of the driver/putter continually changes making finding a proper flow extremely difficult. This wouldn't be bad except the entire flow of hitting the ball is measured by the back and forth flick of a controller thumbstick. Additionally the commentator is continually snide and condescending. I would not doubt it if someone told me that whoever did the voice acting receives constant death threats.. Such a small space but yet nice atmosphere. The sounds and looks good but the lack of something to do might be found as boring to some people. I enjoyed listening to everything ABE had to say.

If you're ok with the fact that it's a short and immersive video clip in VR and NOT INTERACTIVE, you might enjoy it :). Eh, a sorta kinda fun game. Sad I spent money on it.. Only If is an adventure game that, as far as I can tell, was written and made by a few drunk guys all in one week. The story is flimsy but endearing, and the ending (of both branches of the story) is refreshingly funny. The dialogue is quirky and memorable, although a bit incoherent at times. Overall a very nice game for something that's free, but my biggest complaint is that some of the achievements are unable to be obtained. This may change after the publication of this review, but a game should never have to withhold achievements from the players.

**9/10. The game is fun for a quick play session and should be a free to play early access title. But given that the game hasn't been updated, and the developer has been silent, for over a year, I cannot recommend this game.. This is yet another rpg game, besides that this game was very enjoyable, why? because serious battles and events are broken up with humour, the story is absurd and the characters have interesting back stories and emotions.**

**The only thing I would have to complain about is that it has a couple of glitches but the developers are able to fix these issues fairly promptly. All in all if you want a game that cracks you up, gives you a giggle and doesn't take too long this game is for you!**

**7/10**

**I liked the game but I found it hard to sustain my interest at times, and sometimes found it hard to actually find where I had to go as the directions were very vague from the in-game characters.**
