Elliot Quest has reaffirmed my belief that there are people in this world who still know how to make video games. Imagine Zelda 2 without the flaws.. Nice puzzle game.

Cute graphics.

Intuitive controls.

Interesting enemies and approaches to beat them.

Plus add steam workshop, just priceless.

Get it and have fun playing this relaxing game.. "These stairs go up" - Bardin Goreksson. My first look and review of Trial by Viking:

<https://youtu.be/dgbVs6Jy964>. BEST GAME EVER!!!!!!

This game is fantastic. Weapons feel powerful and different, and ship upgrades are all significant. Easily worth the money.

If you're at all curious about this game, try the demo. If you like the demo, you'll like the game.. SpeedRunners is a fast-paced, competitive and enjoyable experience especially if you're playing with friends or with other individuals around the world. What makes this game so thrilling, is that you're trying to become the best runner within the match while facing some frustrating obstacles and hazards, but the real dangers are the players within the game what makes this game so exciting and worth playing. However, if you do want to play online and go up against people with bad WI-FI signals, then that takes the fun out of the game, but I'd recommend you playing with individuals you know, but if you don't have friends pray if you find people who have good WI-FI connection while playing ranked or quick match. In the end, that's what the game is all about fast, fun and a crazy experience and I truly recommend it if you want something simple, but competitive.. I could probably get away with saying the games management, you can place down a house then a business, you can plan out city areas very well, but it has it's deficiencies, i get a lag when i zoom in, it's not a good feature, the helicopters that aren't simulated, not very well done. Probably getting lag issues cause i'm on windows 7, but sim city is better than this already, and we all know the disaster with Sim City not enough space and all that. Cities Skylines is still better at the moment for city building, but of course this game was released in 2008. I didn't expect much to be honest.. good game better than CoC. I've been waiting for the release of this game and now that I've tried it I'm not really disappointed. You get to be a British soldier or a Zulu warrior and run around and fight Zulu warriors or British soldiers. That's what I expected and that's what I got. The little glitches and drawbacks have been more or less covered by other reviews. I'll just say this; if you're interested in this period of history and this subject, buy this game. Remember, it was just released. There're going to be some problems, but \$15 isn't that much for a decent game and if we support the developers now it will make it easier for them to improve the game as time goes on.. Where do we begin?

The cab detail is pretty good and poor visibility one gets from the driving seat of a real Pendolino is well illustrated.

So what's wrong with it? For starters, the Virgin Trains livery (which appears in the 390 folder on the C Drive by default) is missing from inside Train Simulator. I have tried custom installing the livery from a third party but it was not playing ball.

The Pendolino is designed to tilt; which in real life helps round corners but in the game, can cost you a thousand points in just 20 miles of driving on the WCML North route.

Finally, I am a self confessed sound freak and like to look at sound packs from Armstrong Powerhouse. It's a shame they don't as of yet have a sound pack because the ones that came with this are awful.
